

Honda Accord

Independent thinking

Most potential Accord customers are rebels, in their own quiet way. They're not revolutionaries or reactionaries. It's just that following the common herd really isn't their thing.

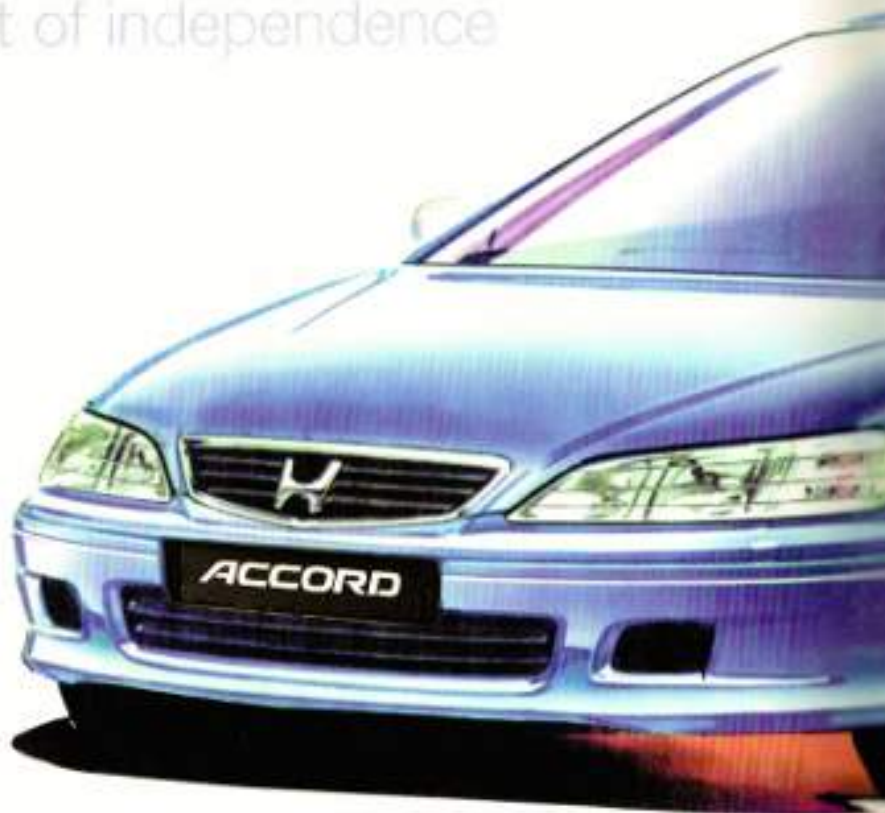

When others are seduced by labels, logos and the latest fad, potential Accord customers have an unerring instinct for genuine quality and class. They want a car that fits their needs and lifestyle, not simply what everyone else at the office, golf club or on the school run happens to drive.

In matters of style, their tastes tend towards the subtle and understated. When it comes to performance, restraint goes straight out of the window.

Above all, they're independent thinkers who consider, compare, contrast and then make up their own mind. Which is exactly how we've approached designing and building our cars for the last 35 years. You could be one of them. Now's your chance to find out.

Concept of independence

Like you, we've always
taken our own unique
direction. Following the
road - not the crowd.

Our dreams, and the desire to make them reality, inspire every car we build. They spark the imagination, excellence and pride that drive Honda forward as one of the world's fully-independent motor manufacturers.

Operating independently means we can also think independently. That's why the Accord incorporates technology that's at the pinnacle

of the motor industry. The Accord's design, performance and specification reflect our freedom to innovate, rise above the ordinary and respond to the people who really matter: you.

The Accord. Share our thinking and experience the power of dreams.

The complete picture

Accord - one name, many faces. The elegance of the flagship Type-V. The poise and refinement of the award-winning VTEC S and VTEC SE. The exhilarating performance of the all-conquering VTEC Sport and Type-R.

Bold, clean lines, potent performance and a distinctive presence are the hallmarks of the entire Accord range. However, every Accord

has one other vital trait in common. It's an immediate sense of order and precision, that everything's been done for a reason and is exactly as it should be. It comes from our uncompromising pursuit of perfection, and an engineering philosophy that doesn't include the word 'impossible'.

Winner of the 'What Car? Family Car of The Year' award in 1999 and 2000, and the world's best selling saloon car. Expert recognition and public acclaim; that's having your cake and eating it.

Combining style, performance and practicality, the Accord 5 door has won awards and admirers since its launch.

WHATCAR?
CAR
OF THE
YEAR
1999
BEST FAMILY CAR

Only a year after its launch in 1998, the Accord 4 door scooped the prestigious "What Car? Family Car of the Year" award and is now the biggest-selling 4 door saloon in the world.

WHATCAR?
CAR
OF THE
YEAR
2000
BEST FAMILY CAR

In 2000, we unveiled the new Accord 5 door, promising even greater flexibility and scooped a second successive award. Yet even with these achievements behind us, we've continued to refine and develop the Accord range still further. Subtle changes in design. Enhanced standard specifications. New models to give you even greater choice.

The new Accord range. Think differently.

The out and thrust of the city
doesn't stop when you leave
your desk - that's the time it
starts. Be equipped, be aware.

Inspiring performance begins with a great engine.
What makes us different is that we don't believe
it also ends there.

Performance is the guiding principle behind
every last detail of the Accord's design.
From the largest body panel to the smallest
engine component, we apply our own individual
thinking to balancing power, handling, ride
quality and fuel efficiency to deliver a truly
satisfying driving experience.

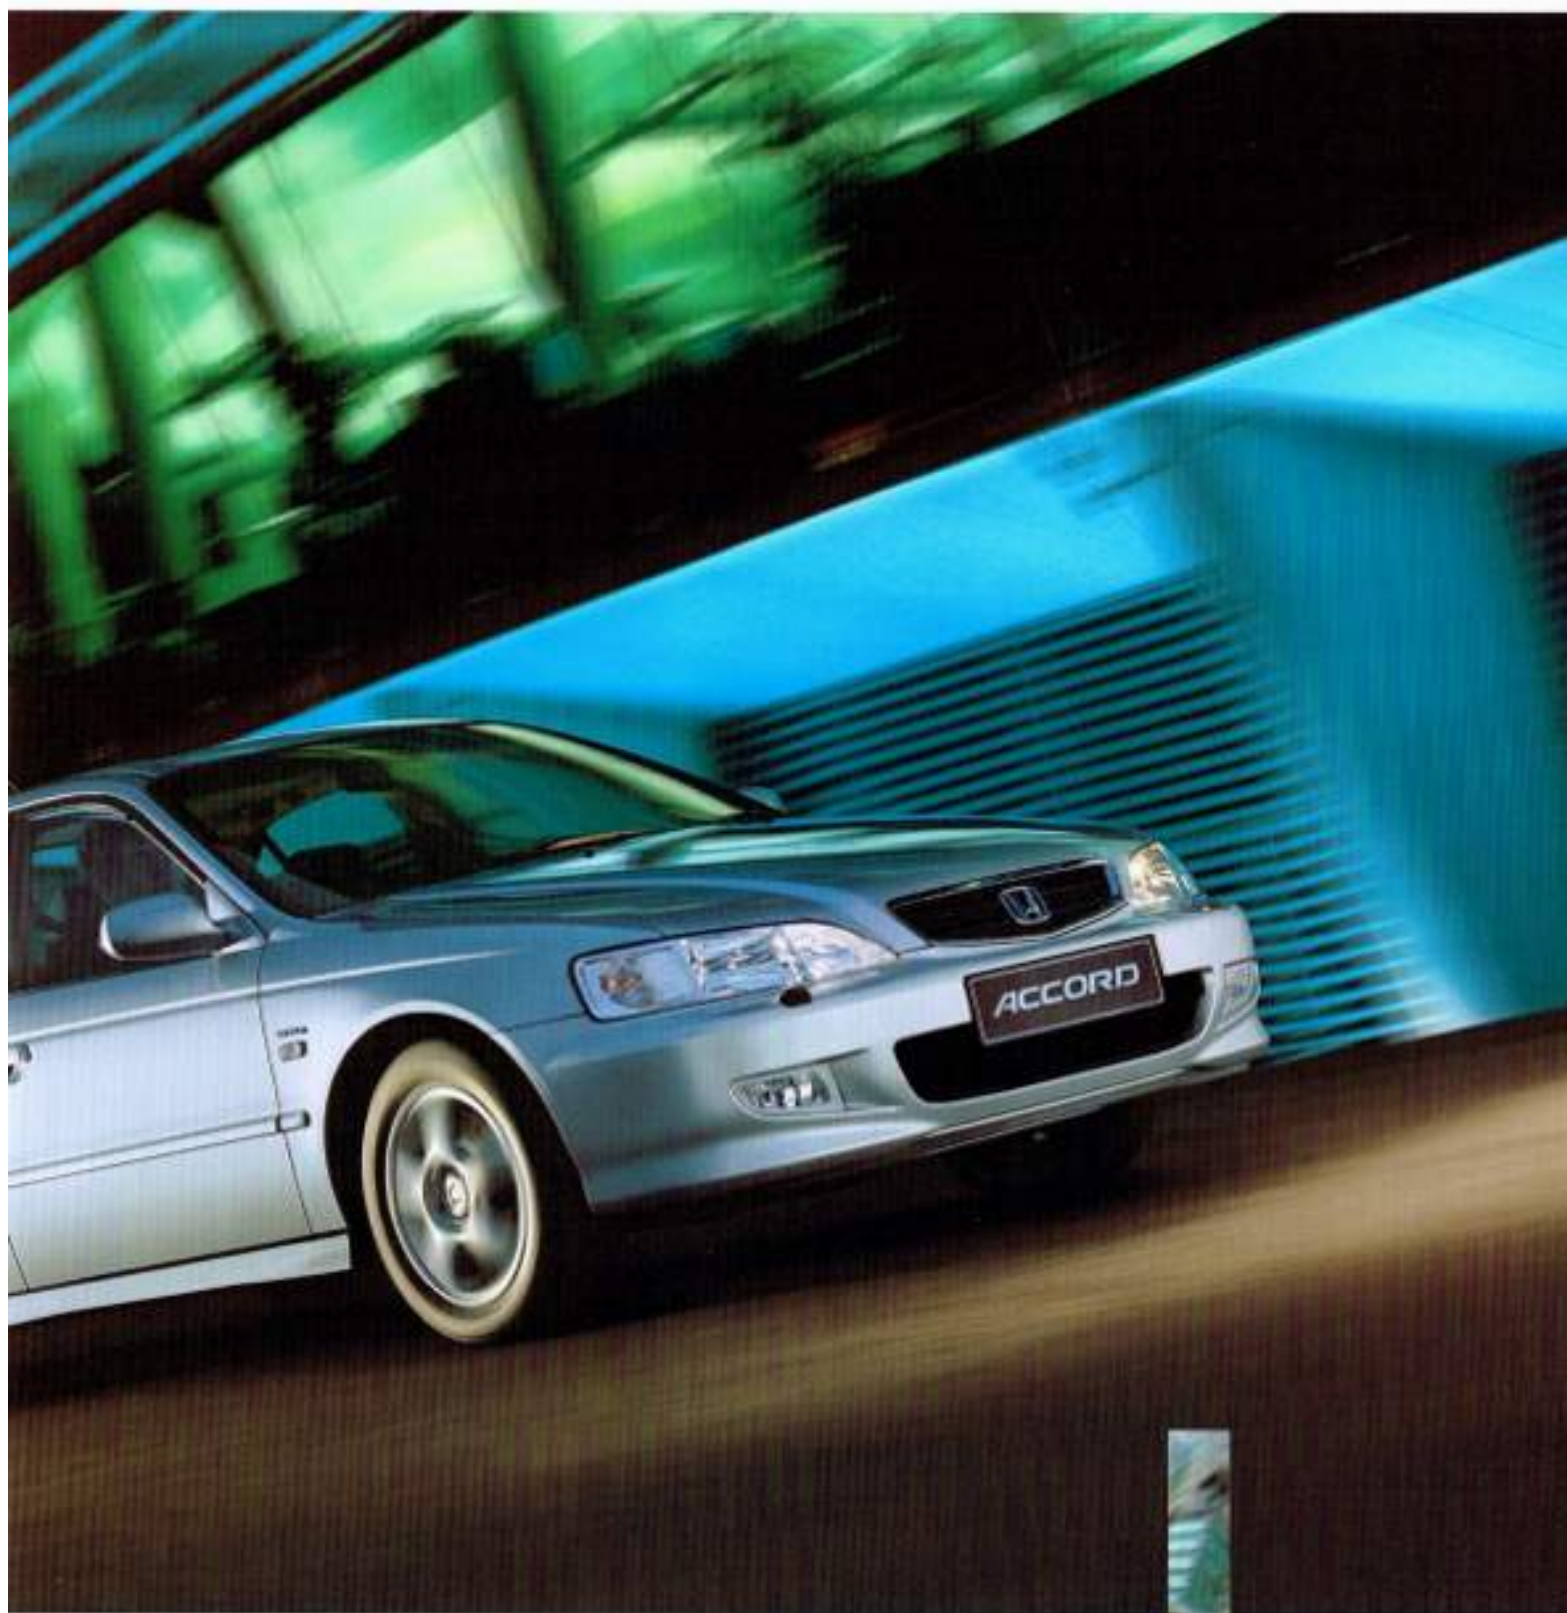

Smooth, effortless power delivery for relaxed
cruising and confident overtaking comes courtesy
of our remarkable VTEC engines: unlike
most, we don't believe that bigger engines
or turbochargers are the only ways to produce
more power. The Accord's specially-designed
suspension, which combines poised, assured
handling with a superbly comfortable ride for
your passengers, is inspired by the system we
developed for our Formula One cars.

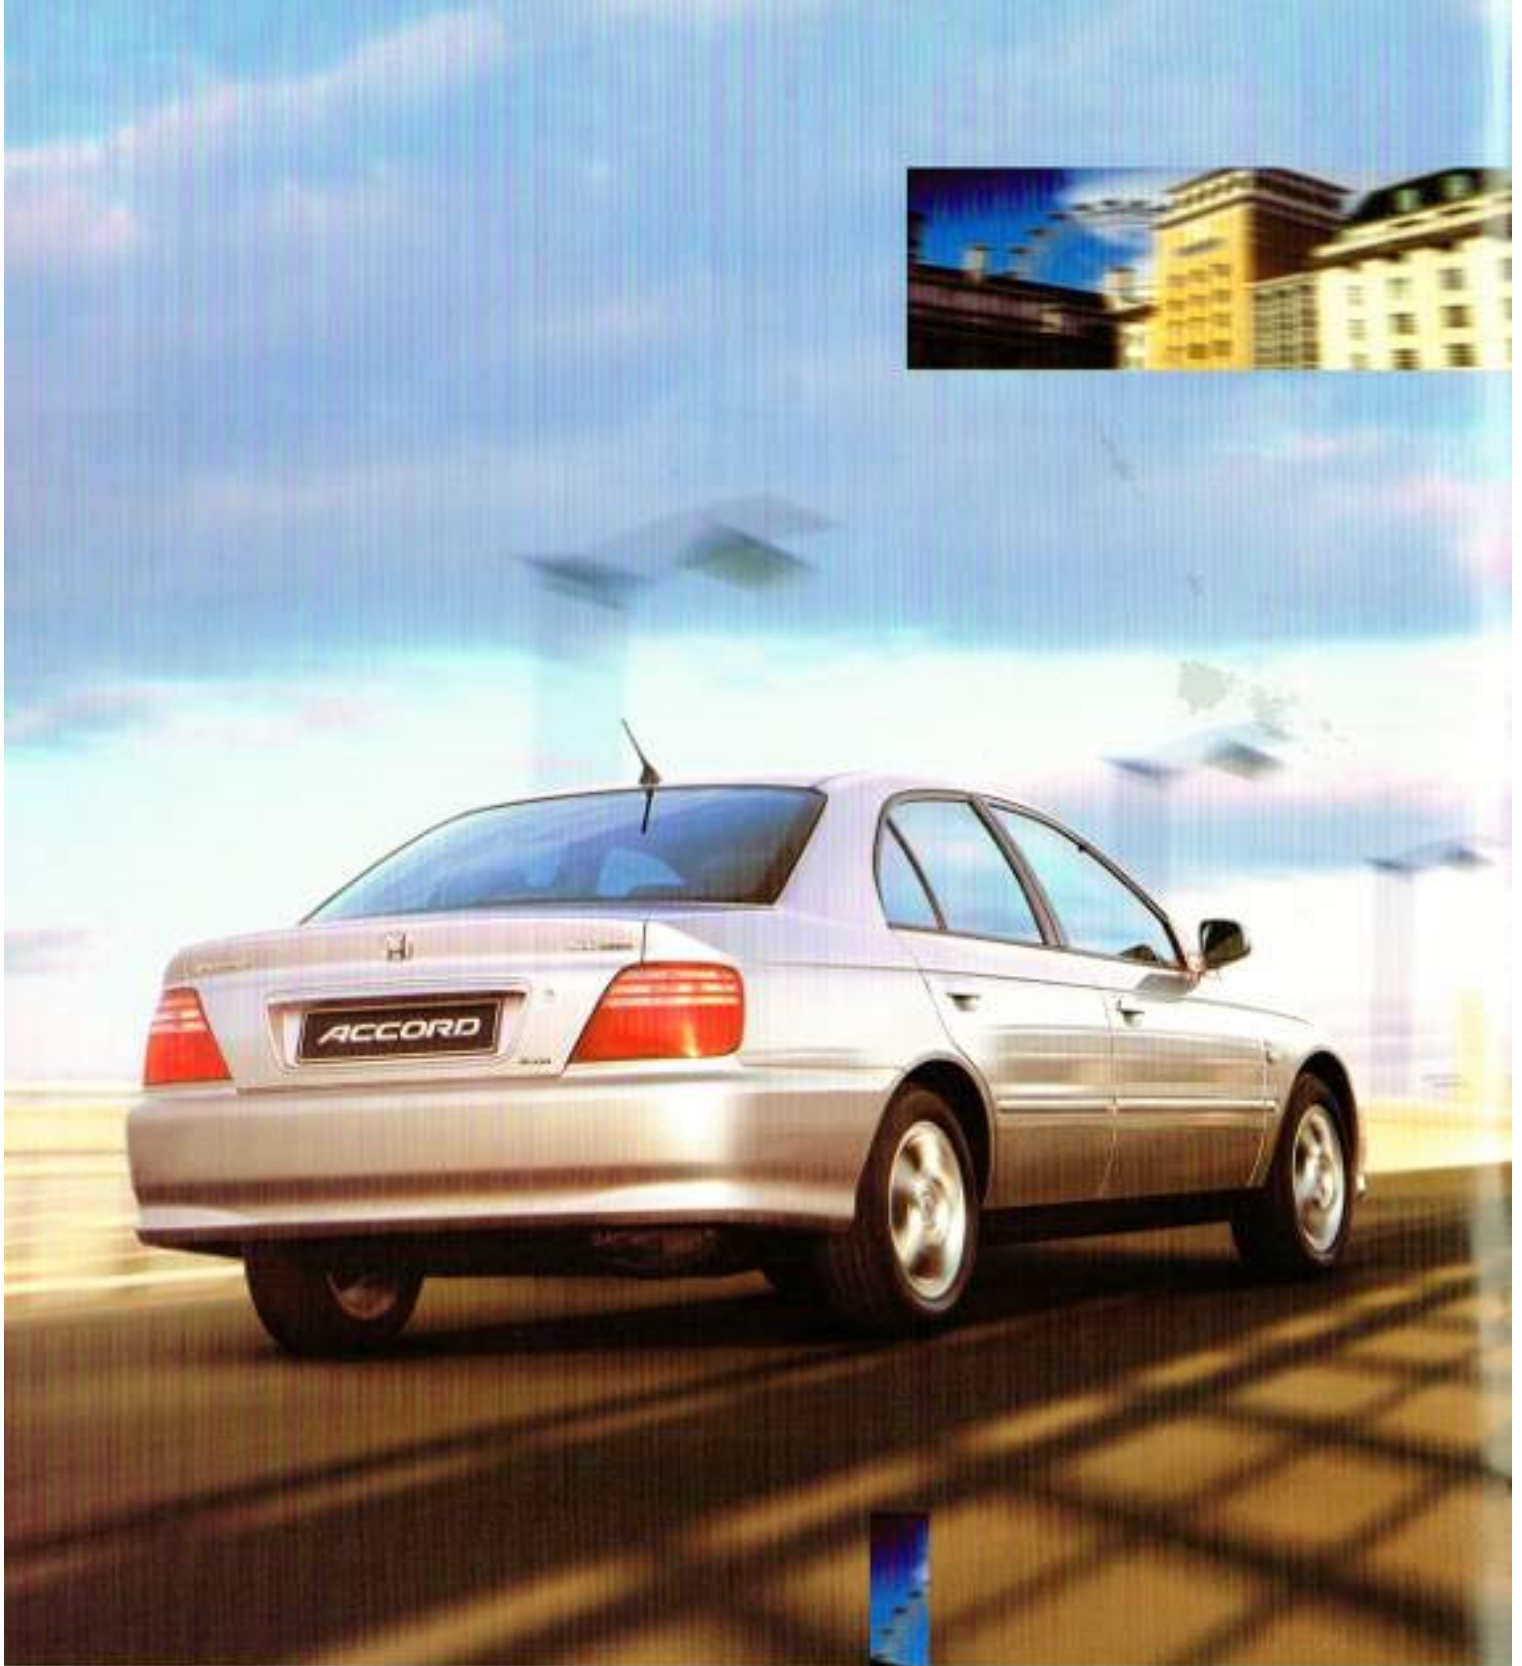

It's this innovative approach that gives the Accord
its unique character: an exciting, involving, yet
efficient and reliable car you can use and enjoy -
every day.

Inspired performance

The Accord gives you two more
things to love about your job.
The drive there and the drive home.

Driving performance

Special places, great journeys,
they all blur into one.
The Honda Accord VTEC.

Independence means you can choose who you work with and who you listen to. In developing the Accord, our R&D engineers naturally went to the experts - Accord drivers. Thanks to their input, our VTEC engines have earned a world-wide reputation for both engineering excellence and driver satisfaction.

The 1.8 litre VTEC engine offers 136 PS and the 2.0 litre VTEC engine, 147 PS, both in either 4 or 5 doors. Did someone say a practical family car can't be fun to drive? In fact, we're so confident of the 1.8 litre VTEC's abilities, it's also our choice of power for the dynamic new Accord VTEC Sport.

Heading up the range, the Type-V's 2.3 litre VTEC engine puts 152 PS on tap for truly effortless performance, whether you're cruising sedately or barrelling through your favourite set of S bends.

Then there's the Type-R. The hand-finished 2.2 litre fuel-injected DOHC VTEC engine with technology straight out of Formula One, produces a searing 212 PS at 7200 rpm.

Whichever Accord you drive, you'll benefit from the legendary reliability, outstanding fuel efficiency, low emissions and smooth, spirited power delivery on which we've built our reputation. One you've helped us to create.

A gentle left-hander, clear road ahead: skim the apex, exhale and get ready for the next one.

Controlled performance

We know what's important to keen drivers, because we ask them. Constant, precise feedback through the wheel. Instant responses from engine, brakes and chassis. Perfect communication between you, the car and the road through eye, ear and hand.

The Accord's steering and dynamics, together with clear instrumentation and a comfortable, purposeful driving position put you in complete control - yet it always feels alive, sharp and engaging, as a genuine driver's car should.

On all models, you can choose our crisp 5 speed manual transmission - the Type-R boasts a specially-developed close-ratio version - or remarkable Sequential Shift automatic*, which allows you to make your own fast, clutchless gear changes whenever you want to get more involved.

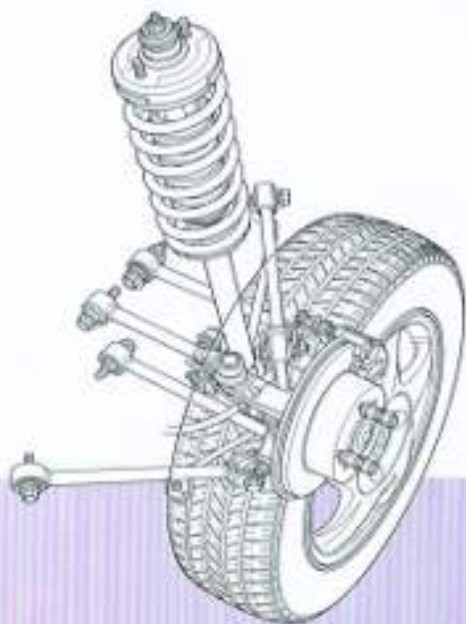

The Accord. Developed by drivers, for drivers.

* VTEC Sport and Type-R available with manual transmission only.

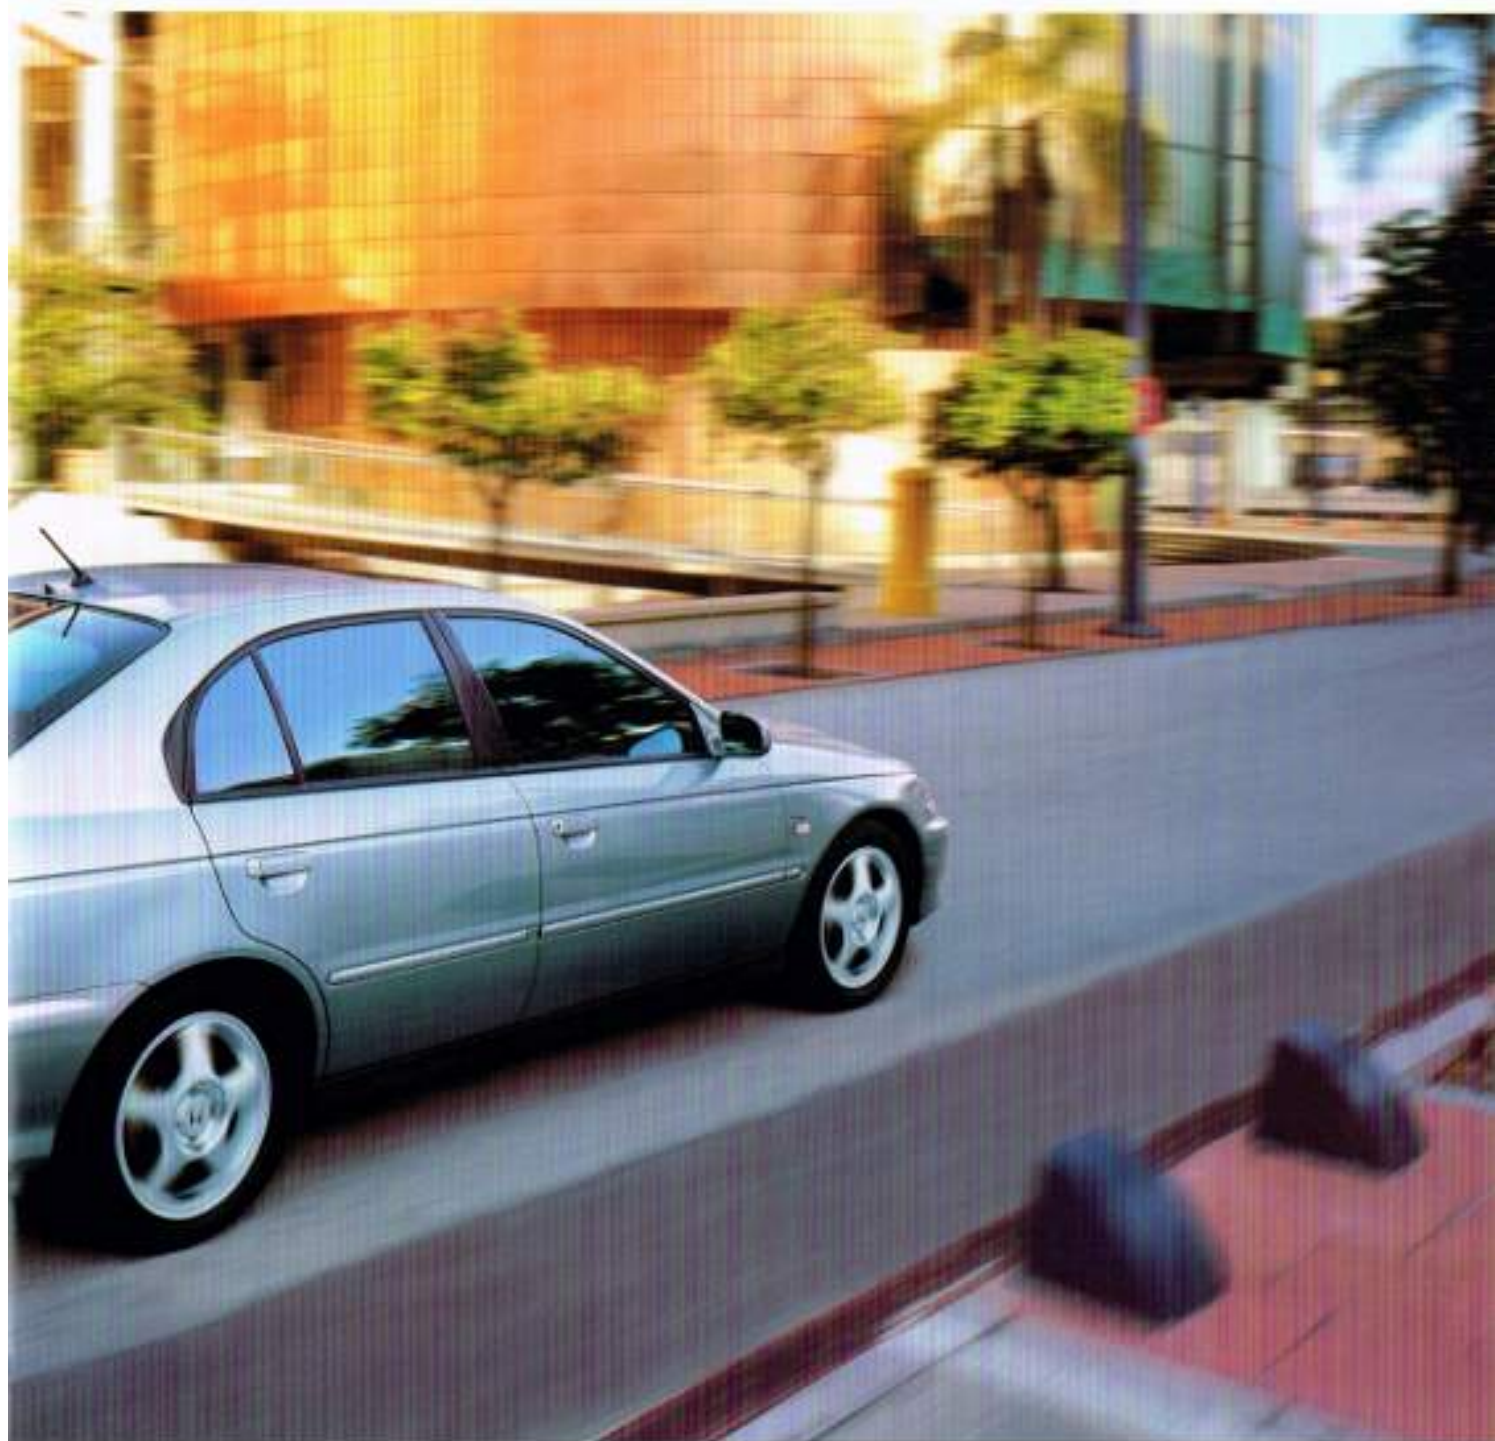

Engineered performance

The secret of the Accord's outstanding handling and ride quality - our unique five-link suspension, inspired by Formula One.

Strong. Durable. Perfectly designed to fulfill its function. That's just good engineering. Add vision, and you create something truly remarkable.

When the engine's at peak power, the Accord's 5-link rear suspension, derived directly from our Formula One cars' double-wishbone system, sticks you to the road for maximum grip and control. Dawdling in heavy traffic, it irons out the lumps and potholes for a supple, comfortable

ride. Whatever the conditions, power is transferred exactly where it's needed for safe, efficient acceleration, braking and cornering. What's more, a compact design opens up extra cabin and boot space, and allows a shorter wheelbase for greater manoeuvrability.

Luxury car. Say the words to yourself. Savour them. Then hold that thought. Now, will anything else really do?

Refined Performance

Standing at the roadside, warmed by the sun, the Type-V embodies a different kind of performance - performance you savour while cocooned in a sumptuous leather and wood interior, with no luxury or detail overlooked. The smooth power flow of the 2.3 litre VTEC engine gives the Type-V its remarkable

refinement and versatility: the enthusiast will be rewarded with surging acceleration and agile, pin-sharp handling. Or you can set the climate controlled air conditioning, flick the cruise control, sit back and enjoy a quiet, relaxed and effortless journey in this superb modern classic.

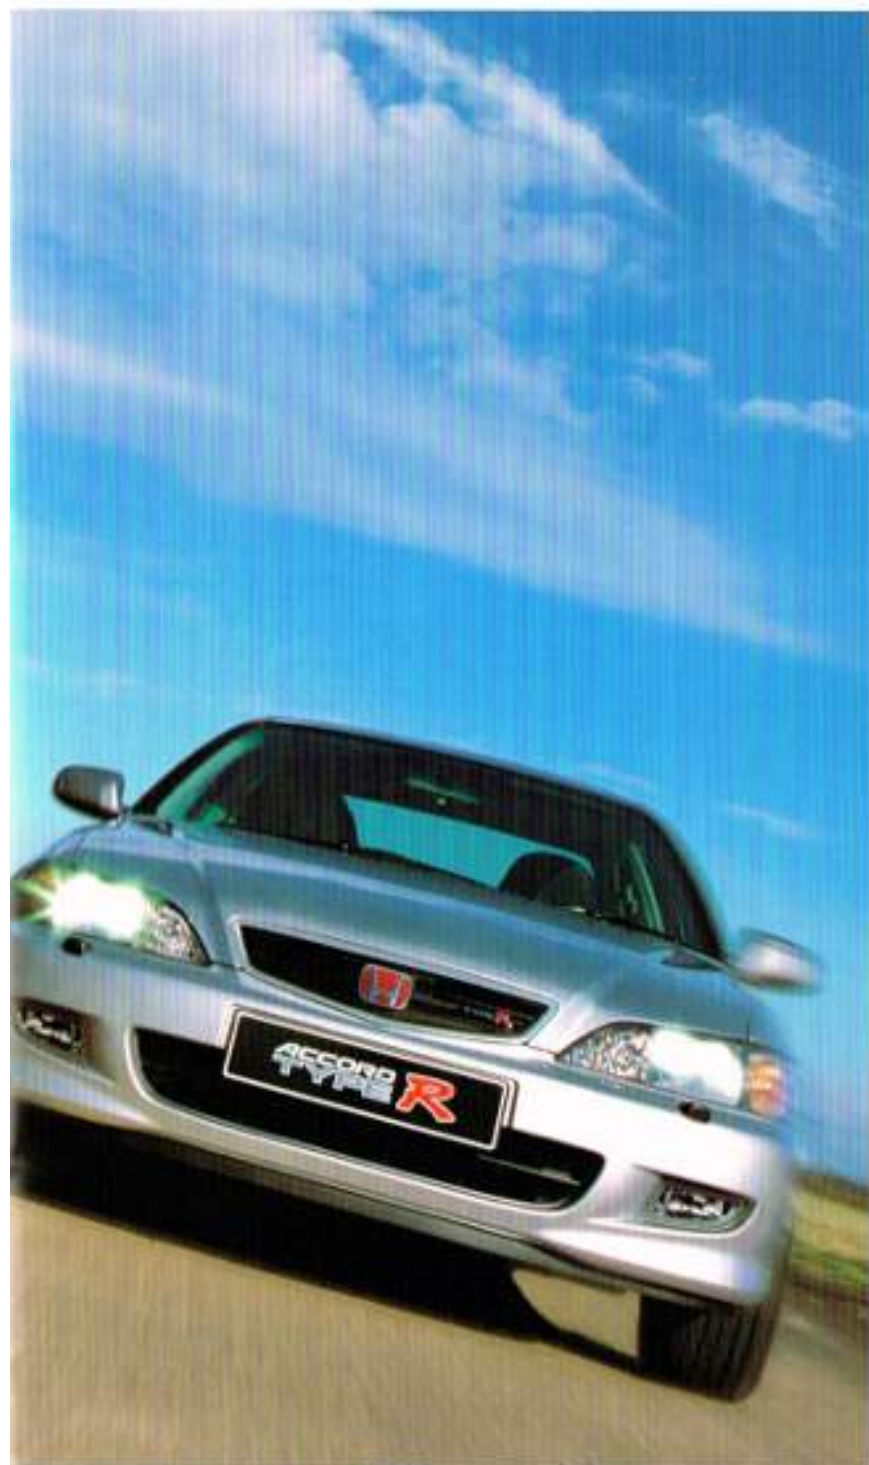

No mistaking what these two are all about. In a range where every model is designed for performance, these outstanding Accords are the ultimate reflection of our racing heritage. Powered by our award-winning 136 PS 1.8 litre VTEC engine, the new Accord VTEC Sport combines superb handling with stunning looks

and a racing-inspired interior. However for sheer exhilaration and excitement, nothing even comes close to the Type-R, with its race-bred 2.2 litre DOHC VTEC engine developing a formidable 212 PS.

The sporting Accords. Pure performance. No competition.

Pure performance

Even we can't promise
you endless open roads.
We can however guarantee
you'll enjoy them when you
find them.

Uncompromising performance

Leaders have the most power. They have the looks and presence that lets them immediately take command. Most importantly, there can only be one. For pure, uncompromising performance, the Type-R stands alone. We've stripped out every gram of excess weight and given the 212 PS, 2.2 litre VTEC engine the low-friction pistons, variable induction intake

and cam technology developed for our Formula One cars.

This superlative car combines the Accord virtues of refinement and quality with the look, sound and feel of a true racing machine.

Type-R. The iron fist in the velvet glove.

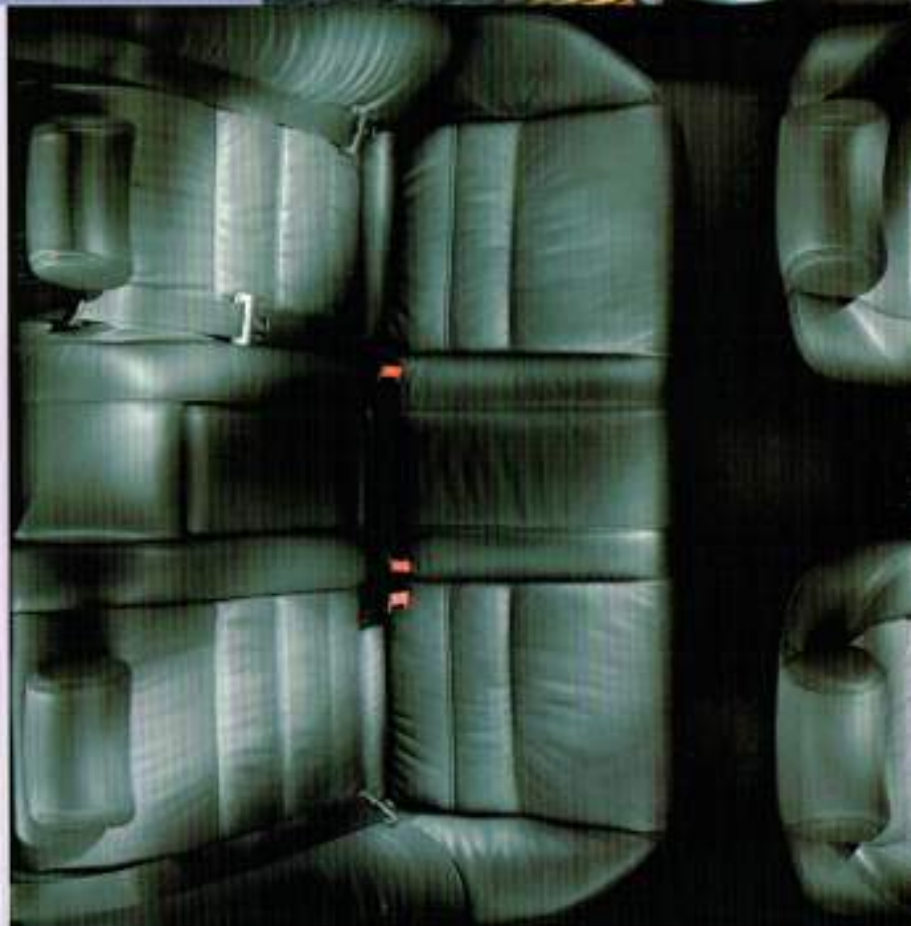

You'd have to go a long way to find something hotter than the Type-R. About 93 million miles.

Race-track performance and handling, yet the Accord Type-R would be a winner on looks alone.

Unrivalled interior

Sit back, take it all in, what you see is what you get. This is the standard interior of the VTEC SE Executive with satellite navigation, yet there's nothing standard about it.

Leather, fabrics, wood, alloy finishes - across the Accord range, the finest materials are carefully selected and matched to create superbly comfortable interiors with unrivalled standard equipment.

Every Accord, including the entry-level 1.8i VTEC S, has power steering, air-conditioning*, remote central locking, electric front windows and a tilt-adjust steering wheel as standard.

Upgrade to the 4 or 5 door 2.0i VTEC SE and cruise control, climate-control air-conditioning, electrically-adjustable

and heated door mirrors, electric tilt slide sunroof, front centre armrest and driver's seat lumbar support join the list. The 2.0i VTEC SE Executive adds electric driver's seat adjustment, heated front seats, leather upholstery and a leather steering wheel.

Dealer-fit accessories, available across the range, include satellite navigation, a mini disc player and rear parking sensors as well as a host of trim variations. So you can make the best even better.

* Optional on Type-R

To be a player, you have to
think big and have an instinct
and passion for the details.

When the outside world's
bombarding your senses every
second of every day, you need
a place to escape. Try inside
the Type-V.

Distinctive interior

It's unmistakably an Accord - the precise fit of the panels, the quality materials, CD player air-conditioning, and electric windows. Yet those white dials with their red needles, the alloy gearknob and titanium-effect trim details are pure motorsport. This meeting of style, comfort and racing heritage sums up what the new Accord VTEC Sport and Type-R stand for. They are distinctive, dynamic and individual, with nothing to distract you from the sheer pleasure of driving. It's also exceptionally spacious and inviting.

However the last word in luxury indisputably belongs to the top-of-the-range Type-V. Wood, leather and chrome details combine to create a sumptuous, meticulously-crafted interior that sacrifices nothing in the pursuit of relaxation and driving enjoyment. Standard equipment includes climate-controlled air-conditioning, Bose® CD sound system and a leather steering-wheel with wood inserts, while an extensive options list lets you add a range of superb extra refinements.

Safety and security

Some things you're happy to share with everyone. Others you want to keep strictly to yourself.

Safe as houses: the Accord is a top performer in the Euro NCAP crash tests.

Honda Accord 1.8i VTEC SE

Here at Honda, we devote immense amounts of thought to the unthinkable. Your safety is our number-one priority from the first line on the drawing-board to the finished car on the road. The Accord's comprehensive safety equipment includes dual front airbags, front side airbags,* ABS with EBD, all-round disc brakes and side-impact protection beams as standard, right across the range.

As a result, the Accord has gained a superb 4-star rating in the Euro NCAP crash tests and is universally recognised as one of the safest cars you can buy.

A car is more than just a machine: it's an extension of yourself, a reflection of your personality. That's why we've gone to such extraordinary lengths to ensure your Accord's security too.

All Accords are fitted with a perimeter alarm, rolling-code engine immobiliser, visible Vehicle Identification Number and remote keyless entry as standard. The Honda Superlock deadlocks prevent the doors being opened even if a window's broken, and the VTEC SE Executive, Type-V and Type-R enjoy the added protection of a CAT 1 ultrasonic alarm system.

It's your Accord. Keep it that way.

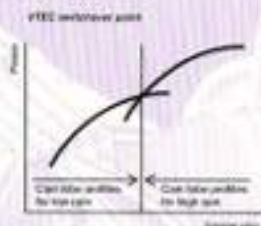

* Excluding Type-R

INTERNATIONAL
engine
of the year
awards 2000

1.4-1.8 litre category

The heart of the Accord: our
award-winning VTEC engines
power the entire range.

At normal engine speeds and driving circumstances, the Honda VTEC system (Variable Valve Timing and Lift Electronic Control) delivers its power in a civilised, progressive, linear fashion. When the engine speed reaches a certain point, the VTEC cuts in, the cam profile changes and the results are breathtaking.

The Accord's engines have been designed to satisfy the enthusiastic driver, providing instant throttle response and practical flexibility.

City streets, country lanes,
motorways and multi-lanes.
Nose-to-tail and right on
the limit. Your journeys.
Our laboratory.

Engine technology

If you're going to lead, do it from the front. This is the awesome 212 PS engine that sits snugly under the bonnet of the Type-R.

The engine is the heart of any car and none more so than the Accord. Our fuel-injected, 16-valve VTEC engines are the result of 35 years' engine research, development and production, and demonstrate just why we've become the world's largest engine manufacturer.

We don't reserve performance, refinement and quality for our larger or more expensive models. Our entry-level 1.8 litre VTEC engine, which provides power for the 4 and 5 door, S and Sport models, took top honours in its category at the International Engine of the Year awards

2000, which recognise engineering excellence and innovation from across the world. Name any other manufacturer who'd use an engine this good in a practical family car.

In our 2.0 litre VTEC SE and VTEC SE Executive models, the additional capacity gives extra power and torque for more relaxed driving. The Type-V and Type-R get their own 2.3 and 2.2 litre units respectively to fulfil their very specific roles.

Our VTEC engines offer exceptional reliability, efficiency and performance right across the Accord range and right across the world.

Formula One - the most demanding test track of all. We've passed that test many times with six consecutive constructors championship victories.

Honda. The power of dreams

As the world's largest engine manufacturer, we've spent over 50 years turning dreams into reality in the world's toughest competitive arena - and developing technology we then apply directly in our production cars. It's a commitment to innovation and excellence that's brought us seven Formula One Constructors' titles, and victory in the 2000 World Superbike Championship.

Yet our successes aren't confined to the racetrack. Our engines are the power behind Honda Formula 4-Stroke, widely regarded as the world's leading one-make powerboat series. You'll even find Honda engines in the air, where strength, performance and reliability are put to the severest test.

We're also world leaders in robot technology. Our latest creation is ASIMO (Advanced Step in Innovative Mobility), which walks, responds to movement and performs a wide range of tasks.

Through this work, we're finding new ways to integrate technology into everyday life, and create future machines with a uniquely human dimension. This unparalleled experience inspires every engine we design and build.

Each VTEC engine boasts 16 valves and fuel-injection, and develops exceptional levels of power, whether its the 1.8, 2.0, 2.3 litre or awesome 2.2 litres DOHC of the Type-R. Engine and exhaust components directly derived from our F1 cars cut noise and vibration, and reduce friction to make your Accord quieter, smoother and more fuel-efficient. Drive the new Accord and experience the power of dreams.

You'll find Honda technology in places that you never expected. But think about it. Is it really a surprise?

"The older I get the more
dreams I have"

The background of the entire page is a photograph of a hand holding a dandelion seed head, with several seeds blowing away into the air against a clear blue sky. In the top left corner, there is a small, rectangular inset image showing a car on a body of water, possibly a boat or a car on a floating platform.

Environment

The time is now

Man has left a huge environmental footprint on the planet. The build up of greenhouse gases has resulted in global warming, changing ecosystems and climates worldwide. Fossil fuel resources are rapidly depleting, yet they remain our principle source of energy requirements. Low level ozone formed directly as a result of exhaust emissions is polluting our cities and damaging our health.

Honda is committed to the preservation of the environment today, and for generations to come. We always consider environmental effects during development, production and disposal.

Environmental awareness is inherent at Honda and has been for many years. We do more than have a policy - we practice what we preach.

At our Swindon plant;

- We use water-borne paints to reduce solvent emissions.
- We have invested £1.5m in an on site treatment plant that handles process water
- Our manufacturing emission controls exceed current and future environmental legislation.
- We landscape our factories to minimise visual impact. At one site, this involved the planting of 60,000 trees.
- We now use 20% less energy than before to produce each car.
- Honda in the UK Manufacturing and Honda Logistics Centre ensure continuous environmental improvement in line with ISO 14001 standards.

Honda's commitment to the environment is reflected not only in our designs for tomorrow, but also in our products available today.

For example:

- We are the first company to produce an entire range of outboard motors that not only meet the Environment Protection Agency's (EPA) 2006 standards, but are 90% cleaner than required.
- Honda's Insight hybrid car has the lowest fuel consumption ever for a combined petrol and electric engine and is described as "the cleanest car on the road in the UK".
- We have recently announced company-wide targets for fuel consumption and exhaust gas emissions for all our motorcycle products to be achieved by 2005. For example, the fuel efficiency for our motorcycles will be improved by 30% whilst reducing emissions by approximately one third. Honda also plans the introduction of programmed fuel injection in 50cc two wheelers, as well as the larger capacity motorcycles, alongside the elimination of two-stroke engines over the next few years.
- Our aluminium engine is a standard feature in our cars to reduce vehicle weight, making them more efficient with less emissions.

Honda may be a global corporation, but our actions also take into consideration the local environmental problems. That's why we have invested years of research and development to make sure our activities have a minimal impact on the environment. Honda's attention to detail ensures a clean and efficient process, from start to finish.

Fuel consumption These are the results of the official new fuel consumption test gradually being phased in by the Department of Transport which adheres to the EC Directive 1000/100/EC. The test is designed to give results that are more representative of actual average on-road fuel consumption. Please note that when economies are fitted to a vehicle fuel consumption and CO₂ figures may differ from those quoted. NB: The figures shown in this booklet are primarily for comparison and will not necessarily be the same as the fuel consumption actually achieved on the road. **Maximum towing weights** are based on the duty of the car with two occupants of 75kg each, towed on a 12% gradient at low speed. At altitudes in excess of 1500 metres, engine output may drop with a reduction in towing capability. Extra weight, such as additional passengers or luggage, should also be deducted from the maximum towing weight. ****For further information please refer to "Your Choice in Car Entertainment" brochure.**

Fuel consumption These are the results of the official new fuel consumption test gradually being phased in by the Department of Transport which adheres to the EC Directive 1999/100/EC. The test is designed to give results that are more representative of actual average or real fuel consumption. Please note that when accessories are fitted to a vehicle fuel consumption and CO₂ figures may differ from those quoted. NB: The figures shown in this table are primarily for comparison and will not necessarily be the same as the fuel consumption actually achieved on the road. * **Maximum towing weights** are based on the ability of the car, with two occupants at 75kg each, to maintain a 10% gradient at sea level. At altitudes in excess of 1000 metres, engine output may drop with a reduction in towing capacity. Extra weight, such as additional passengers or luggage, should also be deducted from the maximum towing weight.

** For further information please refer to "Your Choice of Car Entertainment" brochure.

At Honda we don't just
want customers, we want
partnerships, so we'll be loyal
to you tomorrow and for all
your tomorrows.

Owning a Honda

The answer to what makes Honda cars different lies not only in the joy of driving them but also in the uniqueness of the individuals who own them.

Wherever our cars are built our standards are the same worldwide. We are entirely focused on perfection and have numerous exacting tests to help us towards it. Every single new Accord undergoes a six-stage road test, replicating the road surfaces you are likely to encounter during ownership. It must pass our "monsoon test" - nine minutes in a storm-force rain chamber - developed to check, for example, the new laser-guided robot technology which fits the front and rear screens. With your new Accord you can indulge yourself without extravagance. 9,000 mile service intervals make this luxurious car all the more affordable. The highly competitive 3 year/90,000 mile

manufacturer's warranty is supported by your authorised Honda dealer.

Although our own quality control is rigorous, your Honda dealer will make his own checks before delivery, making sure you are familiar with the controls and features, the warranty and the service schedule.

You'll enjoy this helpful approach whenever you return, for regular maintenance or to deal with a specific query. Such dedication to detail helps to explain why Honda owners are amongst the most loyal. We expect you to be our very sternest critic.

We want you to be our greatest fan.

Accessories

Genuine Honda accessories ensure your Accord fits your lifestyle perfectly, down to the last detail, including stylish body kits and sophisticated parking sensors.

By definition, the independent thinking that brought you to us in the first place means your new Accord has to be unique, distinctive and unmistakably yours. Hence our huge range of superb accessories, from alloy wheels to tow-hitches, to add those individual finishing

touches. As you'd expect, they're all manufactured to the same exacting standards as the Accord itself, and carry the same 3 year/90,000-mile manufacturer's warranty. Please ask your Honda dealer for full details.

We've got accessories to suit every Accord and every Accord driver, inside and out.

Genuine Honda accessories
make your Accord, really your
Accord.

Keep it secure with a whole
range of options, that includes
roof boxes and an up-rated
remote alarm system.

Option: Red/black Carbon
Effect Leather and Suede
Interior (Type-R Only)

Looking after you is second nature to Honda

It begins with building a quality car. It helps with the purchase of your Honda. It continues with customer satisfaction and, of course, it looks after you in every aspect, every day, all year round.

Honda Finance

There are many ways in which Honda Finance can help you drive away a new Honda. We have a range of finance facilities that can be tailored to your exact requirements on both new and used cars. We can meet your

Delivery

We understand that taking delivery of your new vehicle should be a special occasion. Therefore, we ensure you are completely familiar with your new car and the range of services provided by

Warranties

Your vehicle is covered by the three Honda warranties:

1. A 3-year, 90,000 mile mechanical warranty covers your Honda against defects in materials or workmanship.
2. A 3-year surface corrosion warranty

Hondacare Assistance

Every new Honda comes with 3 years free membership of Hondacare Assistance - a motoring assistance programme run in conjunction with the AA. (Chosen because of the AA's unrivalled experience and

needs with a choice of deposits, periods, guaranteed future values, repayments and the option to protect your payments with Honda Finance Payment Protector. Written quotations available from your local dealer. All applications for credit are subject to status. Indemnities may be required.

your Honda dealer, before you drive away. Your car will have undergone an extensive 104 point pre-delivery inspection check plus a 12 point quality control check, and we ensure that all the finance documents (if applicable), insurance certificates and road fund licence are in order for the day you collect your car.

3. A 6-year rust through corrosion warranty covers the body panels and structural parts of your car against perforation caused by corrosion from the inside out (excluding the exhaust system and catalytic converter).

resources in caring for motorists.) Any driver who is legally entitled to drive your Honda may take advantage of the cover, whether the vehicle is at home, on the road, or even in Europe. Hondacare Assistance includes: Roadside Assistance, Home Start, Relay, Relay Plus, Message Service and European Cover.

Hondacare Insurance

The Hondacare Insurance scheme has been specially designed so that Honda owners receive beneficial insurance cover - at competitive rates. To find out more contact your authorised dealer or call 0845 200 8000 for a quote.

Hondacare Budget Service Plan

Your Honda deserves the highest level of after-sales care and attention, expertise that only a Honda dealer can provide. Spreading the cost of servicing and repairs by a fixed monthly pre-payment plan over an agreed period, makes it

Honda Approved Used Cars

Every Honda Approved Used car, whatever the make, undergoes a comprehensive inspection process, approved and independently monitored by the AA. Additionally, we check the car's history to verify the mileage and ensure there is no

Hondacare Extended Warranty

Your new Honda is covered by a 3-year/90,000 mile manufacturer's warranty, but if you plan to keep your car for longer than 3 years this cover can be extended for up to 3 more years on an Extended Warranty programme. To find out more contact your authorised dealer or call Hondacare Extended Warranty on 01992 653399.

easier for you to budget your service costs. Budget Service Plan is available for both new and used cars*, for private and business users. Ask your Honda dealer for details on Hondacare Budget Service Plan. (*Applies to Honda cars registered on or after 1st January 1994.)

Honda Bodyshop

The Honda Bodyshop Programme guarantees service and quality. Don't forget, only one estimate is required and the choice of repairer is yours. The Honda Accident Helpline 0845 200 8000 will assist in the recovery of your vehicle or advise you of the location of your nearest Honda Approved Bodyshop. This service is complimentary.

outstanding finance, as well as checking the Condition Alert Register, Police National Register and the DVLA. For extra peace of mind we include a minimum 12 months Hondacare Comprehensive Warranty and a 30 day exchange plan. Phone the Honda Contact Centre on 0845 200 8000 for your local Honda Approved Used car dealer.

These specification details do not apply to any particular product which is supplied or offered for sale. The manufacturers reserve the right to vary their specifications, including colours, with or without notice and at such times in such manner as they think fit. Major as well as minor changes may be involved. Every effort, however, is made to ensure the accuracy of the particulars contained in this brochure. This publication shall not constitute in any circumstances whatsoever an offer by the Company to any person. All sales are made by the Distributor or Dealer concerned subject to and with the benefit of the standard Conditions of Sale and Warranty given by the Distributor or Dealer, copies of which may be obtained from him on request. This publicity material applies to the UK only Trade Descriptions Act (1968). While efforts are made to ensure specification accuracy, brochures are prepared and printed several months in advance of distribution and consequently cannot always immediately reflect either changes in specification or in some isolated cases the provision of a particular feature. Customers are always advised to discuss specification details with the supplying Dealer especially if your model selection is dependent upon one of the features advertised.
