Accord Type-V

F i r s t m a n , t h e n m a c h i n e

Convention dictates that
a luxury car is a saloon, while a five door
car is merely practical ..

.. as always, our designers care
little for convention

Accomplished

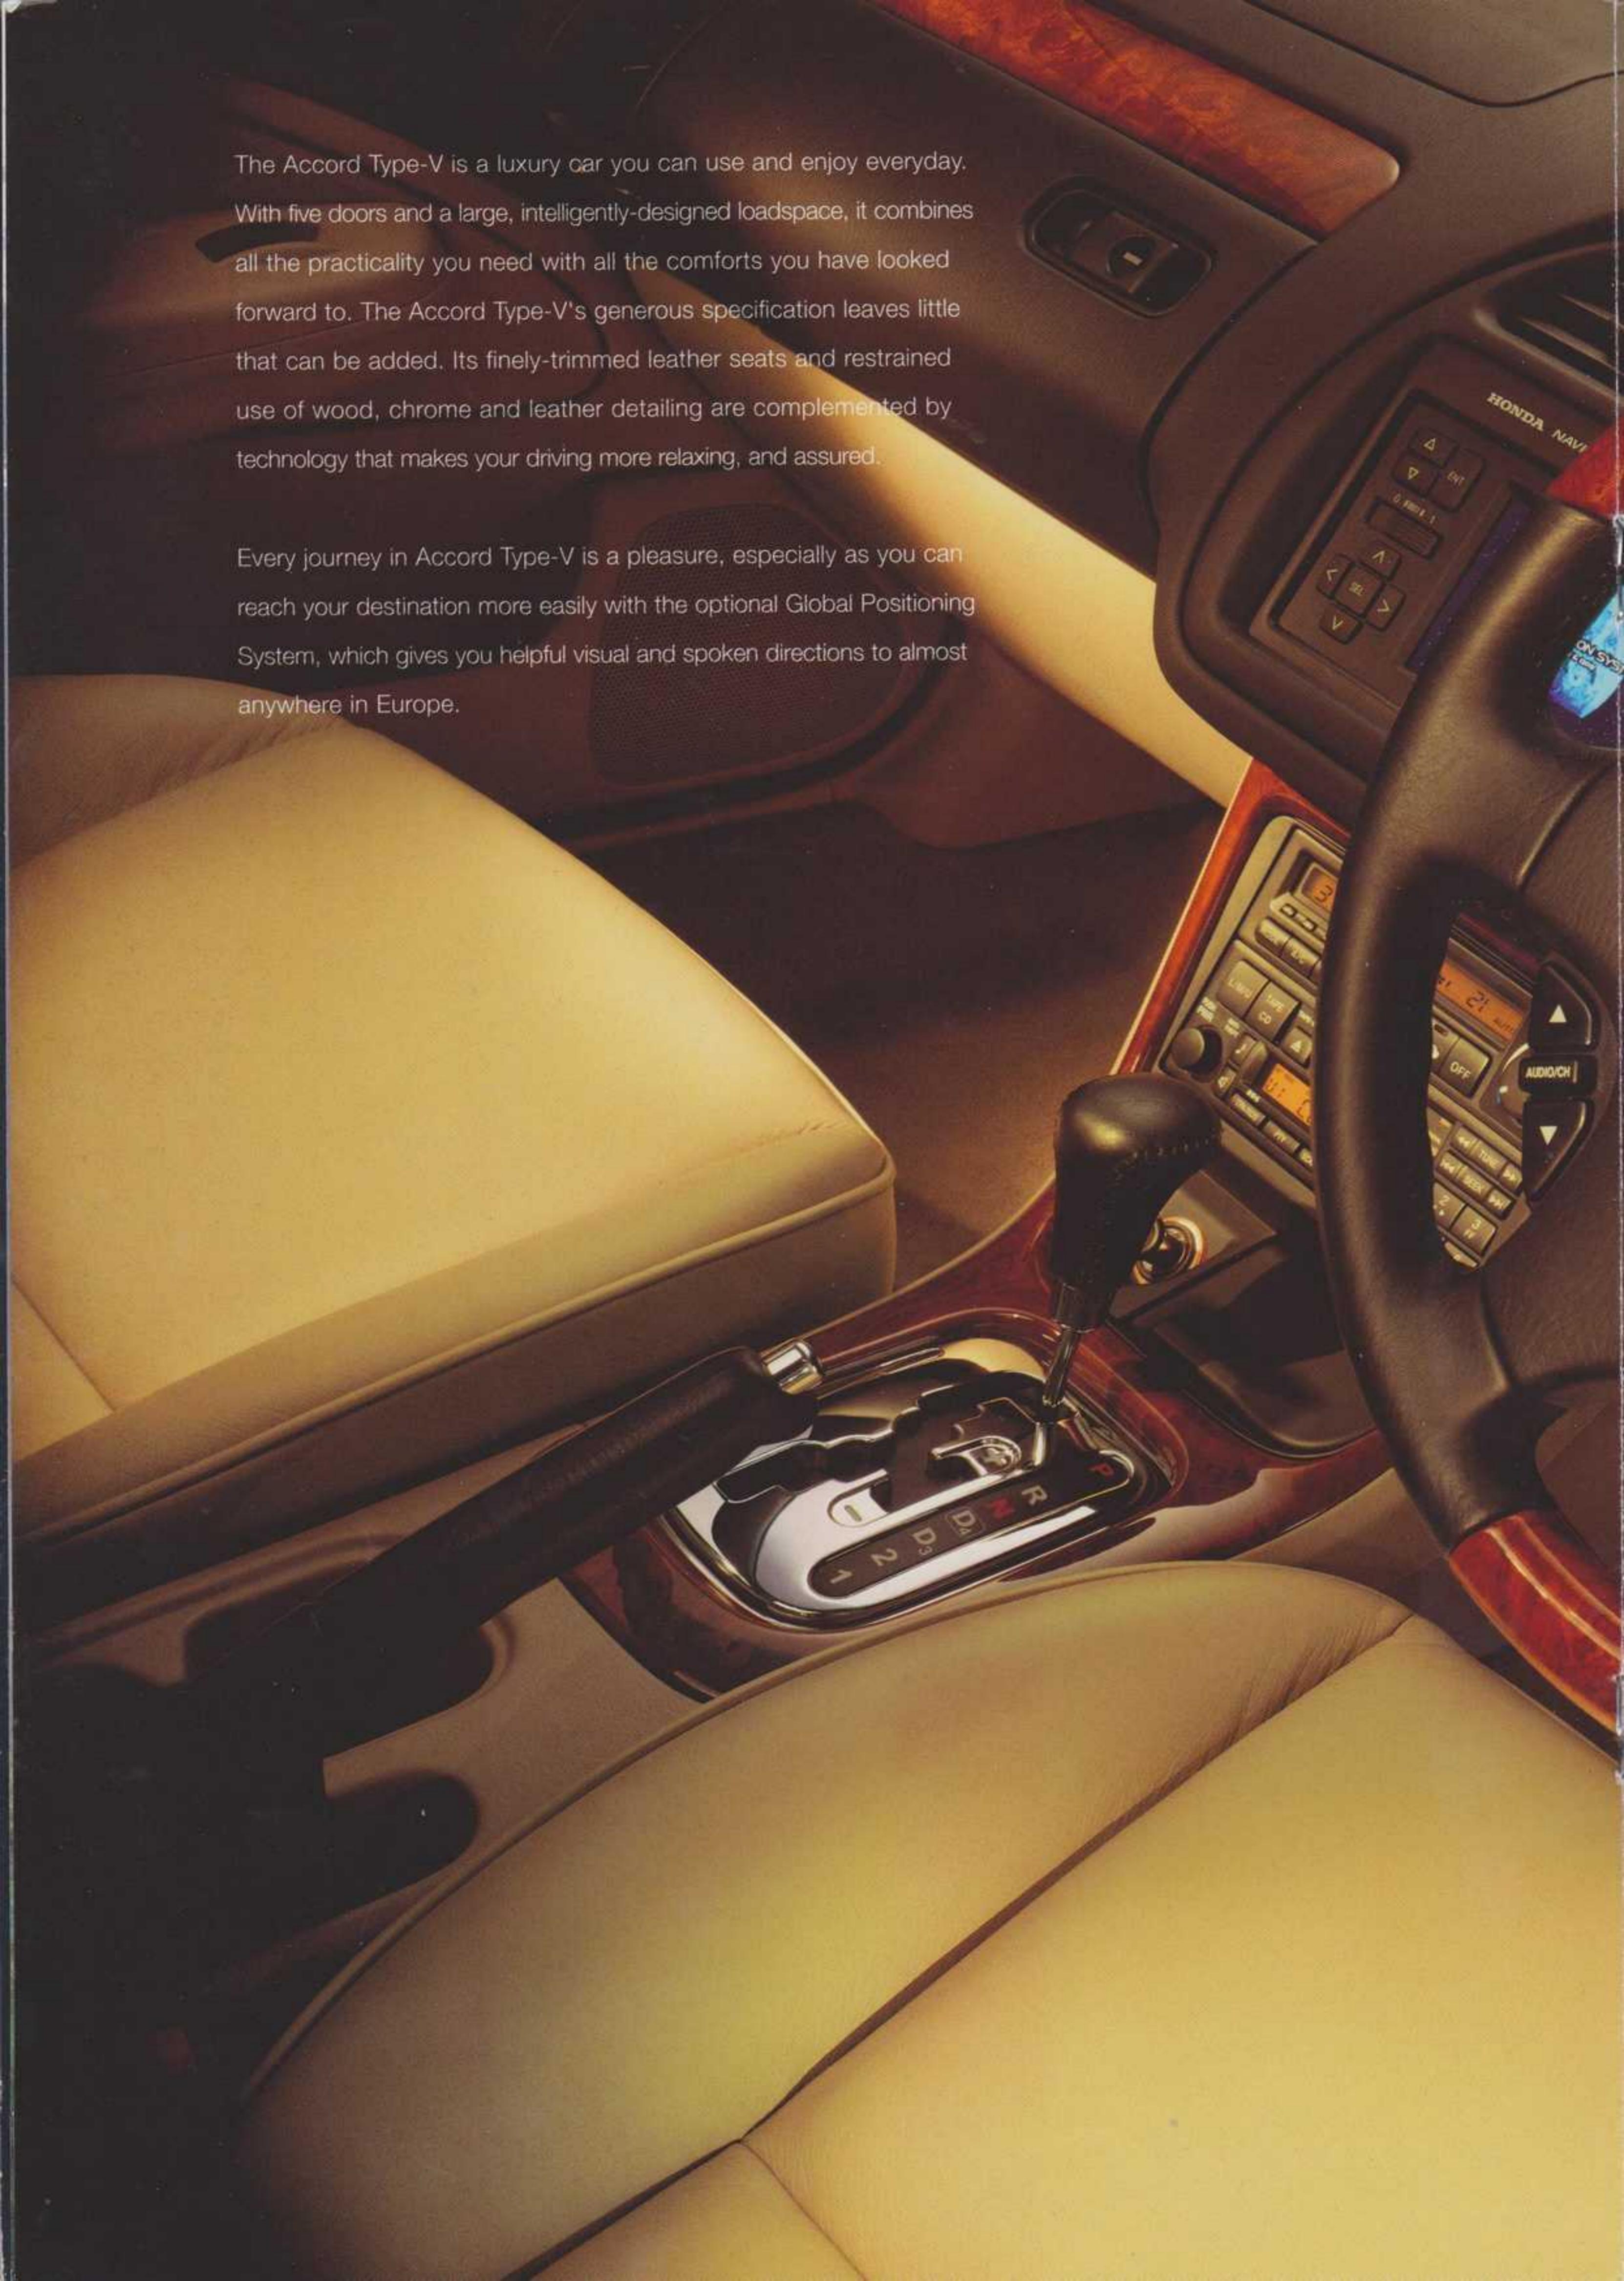

F i r s t m a n , t h e n m a c h i n e

A close-up photograph of a car's interior, focusing on the instrument cluster and part of the steering wheel. The instrument cluster features three analog gauges: a tachometer at the top with markings from 1 to 7 (multiplied by 1000 r/min), a speedometer in the middle with markings from 0 to 40, and a fuel gauge on the right with markings from 1 to 2. The steering wheel has a red leather-like finish and a silver hubcap. On the left side of the dashboard, there is a gear selector lever with a 'D' position. Below the dashboard, a cruise control unit is mounted, featuring buttons labeled 'SET', 'CANCEL', 'RESUME', and 'SOCIAL'.

Enticing

The Accord Type-V is a luxury car you can use and enjoy everyday. With five doors and a large, intelligently-designed loadspace, it combines all the practicality you need with all the comforts you have looked forward to. The Accord Type-V's generous specification leaves little that can be added. Its finely-trimmed leather seats and restrained use of wood, chrome and leather detailing are complemented by technology that makes your driving more relaxing, and assured.

Every journey in Accord Type-V is a pleasure, especially as you can reach your destination more easily with the optional Global Positioning System, which gives you helpful visual and spoken directions to almost anywhere in Europe.

Engineered to be more rewarding

The new Accord Type-V's refinement is more than skin-deep. We have not achieved a peaceful, calming interior simply by adding more sound-proofing, but by using technology to design a car that is quieter and more efficient from the outset.

Our celebrated all-wheel double wishbone suspension is further refined by a new 5-link layout at the rear, which allows us to tune each suspension bush for optimum comfort and road-holding. If such technicalities don't stir you, Accord Type-V's performance certainly will. Also honed by our motorsport success, its 2.0 SOHC engine uses our acclaimed VTEC system to give you gradual, civilised power delivery at normal engine

speeds with an extra smooth surge at higher rpm for safer overtaking. You also have the satisfaction of using a slick-changing five speed manual gearbox or our ingenious Sequential Shift automatic. This operates as a conventional

automatic until you slide the selector lever across, when you can make rapid, smooth gearchanges without the concern of a clutch. Comprehensive electronic safeguards protect the engine and gearbox, leaving you free to focus on the road and enjoy the experience.

Specification

Engines			Exterior		
Engine Type	SOHC VTEC		Body coloured bumpers	•	
Displacement (cc)	1997		Body coloured door handles	•	
Max. power (PS @ rpm)	147 @ 6,000		Body coloured door mirrors	•	
Max. Torque (Nm @ rpm)	184 @ 4,800		Body coloured side protector	•

† Fuel consumption These are the results of the new fuel consumption test gradually being phased in by the Department of Transport. This test is designed to give results that are more representative of actual average on-road fuel consumption.

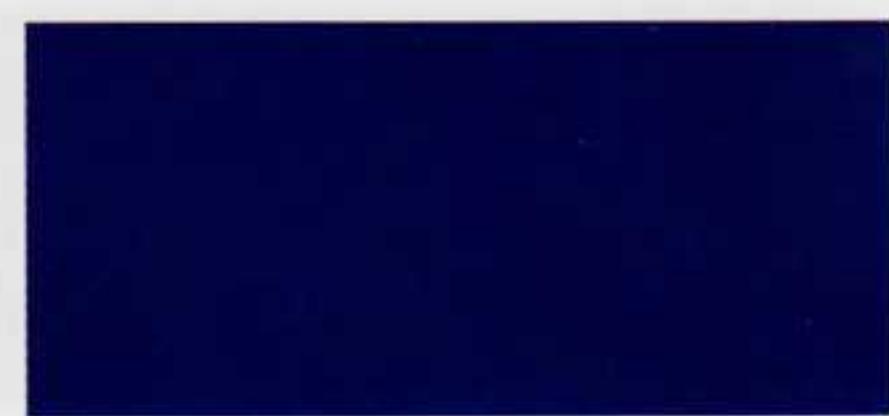

* Maximum towing weights are based on the ability of the car, with two occupants of 75kg each, to restart on a 12% gradient at sea level. At altitudes in excess of 1500 metres, engine output may drop with a reduction in towing capability. Extra weight, such as additional passengers or luggage, should also be deducted from the maximum towing weight.

Reflective

There is more than Accord Type-V's lavish specification to suggest that it belongs to a higher class of car.

The precise fit of every panel and piece of interior trim is testimony to the strength we build into the Accord Type-V's body and the care we take in assembling it.

A lesson in ergonomics, the Accord Type-V's extensive equipment is logically laid-out and easy to operate. Steering wheel mounted cruise control is standard on all models, with the option of Satellite Navigation System also featuring steering wheel mounted audio controls.

The interior provides reassuring safety protection, combined with dual front SRS airbags, side airbags and three-point seatbelts for all five occupants. There's even a rear sunshade to restrict glare which retracts neatly into the parcel shelf.

A hallmark of achievement

The Accord Type-V effectively demonstrates our philosophy, 'First man, then machine'. We considered the features and performance you seek in a car that reflects your own achievements, then harnessed our innovative engineering and pioneering technology to bring you those benefits.

The Accord Type-V has been designed to bring you comfort, versatility and satisfaction throughout your ownership experience - values which your Honda dealer will uphold by conscientious service and dedication to detail, during the 3 year / 90,000 mile warranty and beyond.

To begin enjoying this experience, we suggest you contact your Honda dealer to arrange a test drive of the new Accord Type-V.

These specification details do not apply to any particular product which is supplied or offered for sale. The manufacturers reserve the right to vary their specifications, including colours, with or without notice and at such times in such manner as they think fit. Major as well as minor changes may be involved. Every effort, however, is made to ensure the accuracy of the particulars contained in this brochure. Consult the Dealer with whom your order is placed for details of the specification of any particular product. This publication shall not constitute in any circumstances whatsoever an offer by the Company to any person. All sales are made by the Distributor or Dealer concerned subject to and

with the benefit of the standard Conditions of Sale and Warranty given by the Distributor or Dealer, copies of which may be obtained from him on request. This publicity material applies to the UK only Trade Descriptions Act (1968). Whilst efforts are made to ensure specification accuracy, brochures are prepared and printed several months in advance of distribution and consequently cannot always immediately reflect either changes in specification or in some isolated cases the provision of a particular feature. Customers are always advised to discuss specification details with the supplying Dealer especially if your model selection is dependent upon one of the features advertised.
